

Name: _____

Kerberos: _____

EXERCISE 1

Consider the following let expression in Python:

```
d = b * b - 4 * a * c
```

Rewrite this to an equivalent expression in Scheme:

;;; EXERCISE 2

;; Consider the following list expression in Scheme:

```
(list 1 (+ 5 x 8) 99)
```

;; Rewrite this to an equivalent expression in Scheme,
;; if you don't have the "list" keyword available:
